

Portable Field Antenna Masts

Rapid-deployment mast platform for antennas, repeaters, RF/data links and lightweight field equipment

1,000+ units manufactured and battlefield-deployed in Ukraine

WHERE IT ADDS VALUE

- ✓ Elevate antennas and repeaters without fixed infrastructure
- ✓ Improve line-of-sight for RF / data-link systems
- ✓ Deploy a temporary communication node in minutes
- ✓ Adapt one mast platform to different payloads and systems

Shown: optional field finish. Natural aluminium is standard.

01 — APPLICATIONS

UAV & Data Link Communications

Portable elevation for ground-station antennas, directional RF systems, repeaters and datalink equipment.

Deployable Comms & Public Safety

Rapid temporary communications for emergency response, field teams, remote sites and private networks.

Monitoring, Sensors & Temporary Telecom

Portable support for lightweight monitoring payloads, sensors, cameras and temporary network equipment.

02 — WHY VAXMETAL

- ✓ Field-proven platform for real antenna and repeater systems
- ✓ OEM-adaptable to customer payloads and interfaces
- ✓ Serial production capability
- ✓ Export-ready supply

03 — STANDARD FIELD PLATFORM

- ✓ Telescopic mast
- ✓ Transport bag
- ✓ Guy lines
- ✓ Ground anchors / spiked support
- ✓ Customizable top adapter

04 — OEM / CONFIGURATION OPTIONS

- ✓ Heights: 6 / 8 / 10 / 12 / 15 / 18 m
- ✓ Custom top interface
- ✓ Natural aluminium standard
- ✓ Optional powder coating / custom finish
- ✓ Mission-specific accessory set
- ✓ Optional remote antenna positioning

05 — OPTIONAL ROTATOR SYSTEM

Remote positioning of directional antennas, cameras, sensors and other mast-top payloads without lowering the mast.

For UAV, repeater, RF-link and monitoring setups.

06 — KEY PARAMETERS

6–18 m

HEIGHT RANGE

~5 min

DEPLOYMENT

1 person

SETUP

up to 8 kg*

PAYLOAD

Aluminium

HIGH-STRENGTH

**Depending on mast configuration and operating conditions.*

COMMERCIAL Lead time: 2–4 weeks · Export supply: FCA / DAP · Volume pricing available · Made in Ukraine

Send us your antenna / payload specifications, required mast height and quantity — we will configure the mast and prepare an RFQ.
